IMMILYTICS
HARNESS THE POWER OF DATA

MAXIMIZE BUSINESS ROI

LABOR COSTS

Firms struggle to efficiently draft forms and letters and quickly assemble immigration filings.

Tasks such as organizing/ordering supporting docyments, manual data entry onto USCIS forms, and responding to basic client inquiries take up valuable employee time that would likely be better spent on more complex matters (e.g. drafting support letters).

KNOWLEDGE

Knowledge management is an endless challenge in the fast-evolving world of immigration law.

Given the amount of manual work involved in the preparation of most petitions, many firms feel that it is important to hire individuals with an immigration background, which may be difficult and/or costly in certain markets.

TRAINING FOR CONSISTENCY

New Hire and ongoing staff training is time-consuming. Better general resources and workflow guides are needed.

STREAMLINING

From document naming to data protocols, achieving uniformity is difficult and can impact efficiency and profitability.

ERRORS

Human erros on USCIS forms and letters are a common reason for RFE/RFI from USCIS.

Failure to proofread for human error can lead to RFE/RFIs and other costly mistakes.

Without consistent retrieval of data, discrepancies between data and documents can occur.

MAXIMIZE BUSINESS ROI

IMMILYTICS VALUE ADDS	ROI (RETURN ON INVESTMENT)	LABOR COSTS	KNOW-LEDGE	TRAINING FOR CONSISTENCY	STREAM-LINING	ERRORS
AUTO-DRAFTING TECHNOLOGY INCLUDING: • Petition Drafting (incl. letters and document assembly) • LCA Drafting • PWR Drafting • ETA 9089 Drafting	*This technology reduces time spent on manual tasks through automation, which means more margin for your bottom line.* *Incorporating AI and Automation reduces dependency on industry specialists, leaving more time for your legal teams to focus on business development and complex cases. Research shows incorporating AI and Automation reduces errors and improves data integrity.*	✓	✓	✓		✓
INTELLIGENT CHECKLISTS & DOCUMENT COLLECTION INCLUDING: • Intelligent Case Questionnaires • OCR Technology-Based Questionnaire Completion • Automated Document Naming Technology • Automated Internal Document Filing	*Our customized document and data collection technologies improve your checklists and document requests so both your clients and your legal teams are satisfied.* *Efforts to reduce the churn around information and document collection win time back for legal teams and dramatically reduce cycle times.*	✓			✓	
IMMIGRATION TOOL KIT- AUTOMATED TOOLS INCLUDING: • Bulk I-94 Data Retrieval • Bulk I-94 Document Retrieval • Bulk USCIS Online Case Status Retrieval • LCA PAF Creation • Data Extraction from LCA, PWR, PWD, Supporting Documents, etc. • Incoming Document Handling (Data Updates and Internal e-Filing) • Outgoing Document Assembly (Case Filing)	*Our Document Management Tool is capable of reading USCIS notices (using OCR), naming the files, and uploading them to your Document Management System, which reduces the time your team spends on mail-based filing tasks.* *Many firms struggle with consistent naming conventions and document retrieval; this tool eliminates this problem through the use of consistent file names and the creation of smart folder structures.*	✓			✓	✓
CHATBOTS	*Our ChatBots answer frequently asked immigration and case processing questions minimizing internal and client inquiries.* *ChatBots intelligently inform legal teams of company and government filing practices so you can consistently delight your clients.*	✓	✓
